

## BK Drying Recorders

The BK 3 Speed Drying Recorder has been used widely in the coatings industry throughout the world for several decades. A needle carrier holding six hemispherical ended needles travels the length of the six 305 x 25 mm test strips in 6, 12 or 24 hours. Other speeds are available to special order. A time scale on the side cover is graduated to suit the three different travel times.

The BK 6 and BK 10 Recorders have independently operating tracks allowing tests to be made at different start times. Pairs of tracks operate at the same speed, and a wide range of travel times are available. Travel times of 6, 12, 24 and 48 hours are all considered as standard. A time scale on the front cover is graduated to suit the instrument's drying time ranges. Each pair of tracks has its own individual operating switch.

## Accessories

Hemispherical ended stainless steel needles.

2mm ball ended stainless steel needles.

5mm PTFE ball ended needles for specialist applications.

Teflon coated needles for specialist applications (coated one end).

5 gram brass weights to increase needle load.

Paint film applicators in stainless steel with gap sizes from 10-650 microns .

Glass test strips

Casterguide for use in conjunction with the paint film applicator
