

testo 922 / testo 925

testo 922

The differential thermometer records temperature values from 2 connected thermocouple probes and displays them simultaneously. The reading from an additional temperature probe can also be wirelessly displayed in the testo 922 measuring instrument; i.e. measurement data is transmitted by radio.

Differential temperature can be called up immediately. An audible alarm sounds if limit values are exceeded. Current measurement data such as max/min data can be printed on the Testo printer on site. It is possible to print measurement data once a minute, for example, on the printer if cyclical printing is in operation.

testo 922, 2 channel temperature measuring instrument T/C Type K, connection of an optional radio probe, with battery and calibration protocol

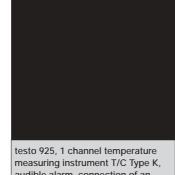

Part no 0560 9221

Advantages testo 922

- 2 channel measuring instrument with optional radio probe
- Displays differential temperature
- Cyclical printing of readings, e.g. once a minute

testo 925

The one channel temperature measuring instrument for connection to fast-action and reliable thermocouple probes. An additional temperature probe can be displayed in testo 925; data is transmitted by radio, i.e. wirelessly. An audible alarm sounds if limit values are exceeded. Current measurement data such as max/min data can be printed on site on the Testo printer.

audible alarm, connection of an optional radio probe, with battery and calibration protocol

Part no 0560 9250

Advantages testo 925

- 1 channel measuring instrument with optional radio probe
- Audible alarm sounds if limit value is exceeded

Joint Advantages testo 922, 925

- On site printout on Testo printer
- Continuous display of max/min values
- Hold button to freeze reading
- TopSafe, indestructible case, protects from dirt and impact (optional)
- Display light
