

HYDROMAT

CM-B STANDARD | Compliant with DIN 18560-4:2012-06 CM-B PRO Standard

The CM-B-Standard and CM-B Pro case sets include meters for determining **moisture in set building materials** and several other materials using the **Calcium Carbide Method**. Beyond electrical measurements, this measuring technique has been known in the industry for years and several professional associations recommend using it for a number of measuring tasks. Using the case sets is easy. All measurements can be performed directly on the object using the tools included in the case and thus quickly allow to obtain information on the particular moisture condition. The decision on whether screed may be laid or a wall may be finished can be made immediately.

Particularly suited for parquet laying or floor tiling contractors, construction companies, architects, or surveyors.

MEASURING RANGE

■ STRUCTURAL MOISTURE

0.30 to 7.50 CM-% using gauge readout

0.14 to 22.90 CM-% using conversion table

A detailed description of the contents of the case sets is found on our website or our price list.
